EDUCATION

Jawaharlal Nehru University <i>Bachelor of Technology in Electronics and Communication Engineering</i>	New Delhi, Delhi 2025-2029
H/S Khairwa Bishnupur <i>Intermediate in Science</i>	Sitamarhi, Bihar 2022-2024

EXPERIENCE

Self-Learning and Project Development <i>Artificial Intelligence and Programming</i>	2025 – Present Remote
- Worked on personal projects related to data analysis and algorithm implementation using Python and C++ - Explored Machine Learning concepts and libraries such as Pandas, NumPy, Matplotlib, and Scikit-learn - Practiced Data Structures and Algorithms through coding platforms like LeetCode	

PROJECTS

Employee Attrition Prediction <i>Python, Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn</i>	2026
- Built a Logistic Regression-based classification model to predict employee attrition using HR workforce data - Conducted extensive EDA, feature engineering, correlation analysis, and categorical encoding to prepare data for modeling - Implemented K-Fold Cross Validation and hyperparameter tuning to enhance model reliability and reduce overfitting - Assessed model performance using ROC-AUC Score, Precision-Recall Analysis, Accuracy, Precision, Recall, F1-Score, and Confusion Matrix - Created ROC and Precision-Recall Curves to analyze classification thresholds and support data-driven HR retention strategies	
Linear Regression & Housing Price Prediction <i>Python, NumPy, Pandas, Scikit-learn, Matplotlib</i>	2026
- Implemented Linear Regression from scratch using NumPy to understand gradient descent and model optimization - Built a Housing Price Prediction model using Multiple Linear Regression with data preprocessing and feature analysis - Evaluated model performance using R^2 Score, MSE, MAE, and RMSE metrics - Visualized data trends and prediction results to derive actionable insights	
Analysis of Rainfall Across India <i>Python, Pandas, NumPy, Matplotlib, Seaborn</i>	2026
- Analyzed rainfall datasets from different regions of India to identify seasonal and regional trends - Performed data cleaning and visualization using Python libraries for comparative analysis - Generated graphical insights to study rainfall distribution patterns across states - Improved understanding of real-world climate data through statistical analysis techniques	
Maze Generator and Solver <i>C, Python, DFS, BFS, Data Structures</i>	2026
- Developed a maze generation and solving system using graph traversal algorithms - Implemented DFS and BFS algorithms for pathfinding and shortest path detection - Designed logic for efficient maze creation and navigation visualization - Strengthened problem-solving and algorithmic thinking through practical implementation	

TECHNICAL SKILLS

Languages: C, Python, HTML, CSS
Core Concepts: Data Structures and Algorithms, Basic Machine Learning
Developer Tools: VS Code, Jupyter Lab, Git
Libraries: Pandas, NumPy, Matplotlib, Scikit-learn
Areas of Interest: Artificial Intelligence, Machine Learning, Data Analysis, Drones and UAV Systems
